

LRAC-A00x Beacon Datasheet

Description

This waterproof flashing alarm beacon provides a clear visual indication for remote alarm or status signalling.

Designed for reliable operation in demanding environments, the beacon features a waterproof construction, making it suitable for outdoor installations or areas subject to washdowns.

The beacon emits a flashing light to ensure high visibility and rapid recognition of alarm conditions.

The unit can be easily mounted to any flat surface for quick and secure installation.

Available in red or amber, with a choice of 30 cm lead or 5 m lead to suit different installation requirements.

Specification

- IP Rating: IP65
- Working Voltage: 12Vdc
